Submitted to:

ENGR. JAN ERROL MAMPUSTI
Subject Professor

Activity 4: Face & Person Detection

Objectives

- Detect faces and people in real-time using MATLAB computer vision tools
- Apply object detection using a pre-trained Haar Cascade classifier
- Capture live video using USB webcam integration
- Draw bounding boxes around detected faces in real time
- Understand basic real-time computer vision pipeline

Materials

- MATLAB
- Image dataset

Procedures

1. Load image
2. Use built-in detector (e.g., `vision.CascadeObjectDetector`)
3. Detect faces/persons
4. Draw bounding boxes

Conclusion

MATLAB enables real-time object detection using pre-trained models.
